SOFTWARE ENGINEERING LEADER

CTO for Leidos Enterprise Health with nearly a decade of experience building cloud-native platforms across federal agencies, Fortune 500 companies, and startups. Combines hands-on expertise in distributed systems, geospatial technology, and AWS with technical strategy, team leadership, and delivery of mission-critical systems serving millions of Americans.

Professional Experience

CTO — Enterprise Health

Oct 2025 — Present

Leidos | Reston, VA (Remote) · Federal Contractor

- Define technical vision and engineering strategy for Enterprise Health solutions serving federal agencies including SSA, HHS, CMS, and NIH. Contributed to $30M in OCG in 2025.
- Lead digital modernization initiatives spanning AI/ML, cloud architecture, data engineering, interoperability, and cybersecurity.
- Shape solution architecture, proposal development, and capture efforts while managing technical risk and aligning with HIPAA and FISMA requirements.

Software Engineer

Mar 2025 — Sep 2025 · 6-month appointment

Social Security Administration | Baltimore, MD (On-site) · Special Government Employee

Departure: Completed six-month Special Government Employee appointment.

- Architected an AI-driven unified service request platform integrating IBM TRIRIGA, ServiceNow, and internal ticketing systems.
- Supported Digital SSN, Death Master File modernization, and EDEN 2.0 SSN verification API initiatives.

API Engineer | HazardHub

Jul 2024 — Mar 2025 · 8 months

Guidewire Software | Remote · Private Sector

Departure: Left to serve on the DOGE engineering team at SSA.

- Built and scaled an AWS-hosted, Kubernetes-based SaaS API platform processing millions of home insurance quotes for insurers across the US and Canada.
- Maintained terabyte-scale ETL pipelines ingesting CSV, GeoPackage, and shapefile data into object, NoSQL, and relational storage.
- Developed a fire suppression scoring algorithm in Ruby on Rails using TDD and owned the location service microservice.

Senior Software Engineer

Sep 2023 — Jul 2024 · 10 months

New Light Technologies | Remote · Federal Contractor

Departure: *Pursued an opportunity to engineer higher-scale commercial systems.*

- Tech lead for a Terraform-managed serverless Vue.js application with AWS Cognito supporting low-carbon development initiatives in Vietnam.
- Developed a US Census Bureau executive analytics application for small-business grant insights using Vue.js, SST, and AWS CloudFormation.

Senior Software Engineer

Sep 2022 — Sep 2023 · 1-year contract

University of Maryland | Remote · Academic Research

Departure: *Completed contract and transitioned to the private sector.*

- Recruited and led a four-person engineering team developing decentralized geospatial infrastructure under a multimillion-dollar grant from the Filecoin Foundation for the Decentralized Web.
- Contributed to open-source projects including ipfs-stac, integrating geospatial data with Filecoin and IPFS.

Career Break

Feb 2022 — Sep 2022 · 7 months

Built independent projects with Terraform, AWS, and Django and sharpened algorithmic problem-solving. Documented projects at jsolly.com/blog.

Integration Consultant

May 2021 — Feb 2022 · 9 months

Yellowfin Business Intelligence (Acquired by Idera) | Remote · Private Sector

Departure: *Exited following the acquisition to pursue new opportunities.*

- Supported enterprise accounts generating over $1M in annual recurring revenue as technical consultant and Tier 3 escalation engineer.
- Built integrations with REST, SOAP, and JavaScript APIs and led a two-version upgrade for Yellowfin's largest independent software vendor.
- Resolved complex production issues in cloud, on-premises, and hybrid deployments.

Software Product Engineer

May 2017 — May 2021 · 4 years

Esri | Redlands, CA (On-site) · Private Sector

Departure: *Relocated for family career needs; remote work was unavailable.*

- Managed SaaS and on-premises release quality for ArcGIS Dashboards with a nine-engineer team and cross-functional stakeholders.
- Coordinated product, QA, localization, and release processes with no production hotfixes over a four-year tenure.

Education

Master of Science in Geoinformatics 2015 — 2017

George Mason University · GPA: 3.93

Bachelor of Arts in Geoinformation Science 2013 — 2015

University of California, Santa Barbara · GPA: 3.85
